

Center for Safety Training Current Class Offerings

Supported Scaffold User Hazard Awareness Training – This course is designed to help the scaffold user recognize the hazards on various types of scaffold. The course incorporates a PowerPoint presentation, video, exam, and a practical student participation module. We will focus on inspection, platform construction, capacity, use, access, weather and training for users. A certificate will be issued upon completion. *Note: This course is not designed for workers who are involved with erecting any type of scaffold. This is not a Competent Person training class.*

Course length: 5.5 hours

MEWP (Mobile Elevated Work Platform) Training – This course meets OSHA, ANSI and manufacturer's requirements for training. This course involves classroom training, PowerPoint presentations, videos, an exam and a practical hands-on skill evaluation. The class follows ANSI 92.24-2018 for training. The class will consist of Type 3A (scissor lifts) and 3B (boom lifts). Other type and groups can be done upon request. Cards will be issued upon completion.

Course length: 8 hours

Swing Stage Awareness Training – This course is to provide basic knowledge of the code of federal regulations covered under 29 CFR part 1926 Subpart L. The class focuses on how the codes apply to the daily usage of Swing Stage equipment and proper inspection techniques. It is designed for the awareness of both experienced and non-experienced users and emphasizes safety for those workers operating a swing stage. An interactive hands-on section is conducted to ensure students understand the concepts that were reviewed in the classroom. A certificate is issued upon completion. *Note: This course is not designed for workers who are involved with erecting any type of scaffold. This is not a Competent Person training class.*

Course length: 8 hours

Fall Protection Authorized Person Training – This course is designed for anyone who is working at heights. This course is designed to give all students the knowledge base to have a working understanding of personal fall arrest and rescue equipment. The course includes both classroom and hands-on training and has a built-in written and practical exam. Upon completion of the course each student will be provided a certificate acknowledging their successful completion of this authorized person course which meets and exceeds the OSHA and ANSI requirements for training.

Course length: 4 hours

Fall Protection Competent Person Training – This course is designed for anyone who is working at heights as well as decision makers and supervisors who are responsible for answering questions about fall protection. This course is designed to give all students the knowledge base to identify hazards both existing and potential, and the information needed to mitigate those hazards. The course includes both classroom and hands-on training and has a built-in written and practical exam. Upon completion of the course each student will be provided a certificate acknowledging their successful completion of this competent person course which meets and exceeds the OSHA and ANSI requirements for training.

Course length: 16 hours / over 2 days

Rough Terrain Forklift Training – This course includes classroom presentations followed by a written exam plus a hands-on skills evaluation and test. The classroom portion focuses on key information needed for the safe operation of a rough terrain forklift per OSHA 1910.178 and ANSI guidelines. Students will gain the skills needed to: understand the technical and stability aspects of forklift operations; identify workplace hazards, understand load charts, demonstrate how to conduct a site inspection; and demonstrate how to conduct an equipment safety inspection. A wallet card is issued upon completion.

Course length: 8 hours
