

Single profile Walk-through Stirrup

Single profile walk-through stirrup

- almost completely made of aluminum

Two stirrups in one!

Innovation: modular high (7'- 2") and low (4'- 6") configuration

Compact and easy for storage and transport through clever designed aluminum extrusion profiles and foldable parts

Easy mounting and transport due to big wheels

Universal hoist support

- adaptable to great variety of hoists up to 1,500 lb.

NEW!

Features and benefits

Flexible use

- Mounting virtually anywhere along the length of the platform
- Stirrup in low configuration provides a closer position to the suspension point
- Easy to adjust (high-low) by use of connecting pins
- Maximum working space due to position of hoist outside the platform
- High stability by innovative mounting construction
- Suitable for single person workage (high configuration only)

Easy mounting

- Ergonomically mounting by 1 person, without lifting
- Easily foldable through innovative profile and connecting pins
- Adaptable to great variety of hoists **

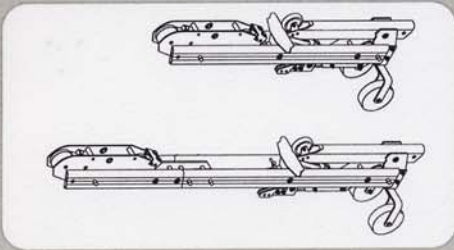

Compact storage and transport

- Low weight compared to (Altrex) steel stirrups: low configuration 92 lb. (-35 %) and high configuration 117 lb. (-20 %)
- Saving of at least 50% in storage
- No loose parts

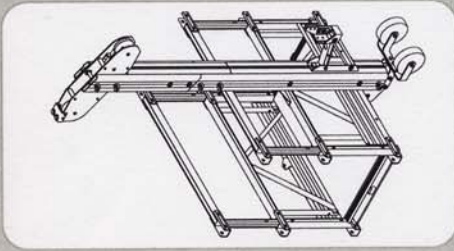

Low-maintenance

- Sheaves and cable guides are easy to inspect and to replace
- Low-maintenance through the use of aluminum and galvanized steel parts

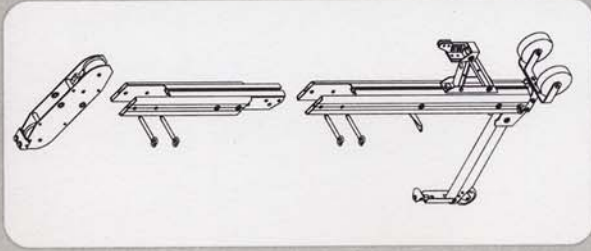

** Universal hoist support compatible with all popular traction hoists from Power Climber™, Sky Climber™, Spider™ and Tractel™. Adapters are available to mount the Salsway™ and H-Lo™ hoists.
